

empowered Audit Management

Connected Risk provides a comprehensive, flexible, and scalable Audit Management solution that streamlines audit planning, execution, and reporting. With automated workflows, real-time tracking, and advanced analytics, it enhances audit efficiency, ensures compliance, and strengthens internal controls. Its modular design integrates seamlessly with governance frameworks, improving risk oversight, transparency, and decision-making.

Now integrated with Microsoft Office 365 for the Web 

KEY FEATURES

Audit Planning

Define audit scope, objectives, and schedules with configurable workflows.

Workpaper Management

Centralized repository for audit documentation, ensuring version control and accessibility.

Issue & Finding Management

Capture, track, and remediate audit findings with built-in corrective action tracking.

Risk-Based Auditing

Prioritize audits based on enterprise risk assessments to focus on critical areas.

Automated Audit Workflow

Streamline audit processes with task assignments, approvals, and notifications.

Customizable Reporting

Generate comprehensive audit reports with data visualization and analytics.
